

RazorEdge and Rackspace Announce Entry Into Rackspace Partner Network

San Diego, CA – Thursday, March 25, 2010 – [RazorEdge](#) today announced they have entered into a Member partnership in the Partner Network with [Rackspace®](#) Hosting, (NYSE: RAX), the world's leader in hosting. This agreement is designed to add mutual value for their current clients and to increase targeted exposure and reputation for both companies.

"Managing caching, content delivery and hosting are very core concerns of our clients who trust us to design and deploy multichannel ecommerce platforms based on Microsoft Commerce Server. Rackspace is one of the few solution providers out there with a flexibility and range of offerings to meet our client's needs," said RazorEdge CEO, Reynaldo Zabala. "Their Cloudfiles offering allows us the benefits of a true CDN ("Content Delivery Network") without the headaches in setup. As Cloud Computing adoption increases, many of our Fortune 500 clients will not be ready to host all of their data in the Cloud. With Rackspace's hybrid solutions our clients can take advantage of their Managed Hosting Solutions, Cloud Servers, or both. At RazorEdge, this type of flexibility is vital to our success as the mindset of our clients runs the full gamut from conservative to fast follower to bleeding edge."

RazorEdge is the premier global provider of design, development and delivery of multichannel ecommerce platforms that leverage Microsoft Commerce Server technologies. RazorEdge subject matter experts can provide a range of services guiding you through your requirements specifications, designing your platform, integrating with your key line of business systems, and carrying out hands on implementation and rollout of your platform. RazorEdge team members take the difficulty out of mapping a company's operations and its associated business processes to their chosen technology, Microsoft Commerce Server. At RazorEdge, the only goal is to ensure that clients maximize the ROI on their investments in Microsoft technologies and means ensuring that technology infrastructure will matches the business strategy and roadmap.

With a multitude of companies offering software products used for rolling out an ecommerce selling platform, selecting the right solution can be a daunting task. For those firms who have chosen Microsoft Commerce Server as the core ecommerce technology, RazorEdge is the answer to ensuring that proper steps are taken to mitigate risk, and ensure project success for client stakeholders.
